The schedule packet will evaluate both the amount of work completed versus the schedule and the cost to date. No additional compensation will be provided for this task.

The following question regarding this project was received. Following the question is the response.

1. In review of the project plans we are not finding a grading plan that has existing contours. In order for us to properly evaluate the earthwork we need to have existing and design contours to do our earthwork takeoffs. The various cross sections and profiles do contain limited existing elevation information but there is not enough information to create the existing surface without huge assumptions. Can the City provide existing contour information where grading will be taking place? *Attached is a PDF document with the existing and proposed contours to be used for proper evaluation of the necessary earthwork.*
