HOW TO COLLECT WATER SAMPLE

- Fill a clean glass or plastic container without any strong odors, with at least a quart or a liter (i.e. 32 OZ) of your well water.
- If the home has a whole house filtration system, collect the water at the well head prior to any filtration or softener systems if possible.
- Let the water run 2-3 minutes before collecting the sample.
- Fill the container with water as close to the time of testing as possible.

**At the event, we will be collecting information about your well (i.e. well construction information).
All information is voluntary.**
