Maximum Load Height: ________________________________

Location move is originating from: ________________________________

Location move is terminating at: ________________________________

Detailed travel route from point of origination to point of termination: ________________________________

------------------------------------------------------------------------------------------------------------------

All route surveys must be submitted at least two weeks before the actual move date in order for Farmington Electric Utility System to have sufficient time to check the proposed route. The proposed travel route will be looked at for conflicting line crossings involving Farmington Electric Utility equipment or lines. When the route has been checked, Farmington Electric Utility System will then issue a letter of clearance to the person or company requesting the survey.

The Farmington Electric Utility System does not include foreign utilities in our letter of clearance. The person and/or company requesting a route survey must contact cable tv, phone and any fiber companies to request a route survey from that respected company.

If there is a conflict with Farmington Electric Utility lines and a tall load to be moved, Farmington Electric Utility System will provide a crew to move Farmington Electric Utility lines only. We are not responsible for other utilities lines and will not move or disconnect them.
